Lonestar Services Donating Four (4) REME HALO®™ In-Duct Air Purifiers in Response to Governor Abbott's Executive Order GA-34

- Lonestar Services has protected over 50million cubic feet of breathable air with the REME HALO® and similar products since the lockdowns of 2020
- REME HALO® is clinically proven to inactivate 99.9% of COVID-19¹
- The CDC has classified the SARS-CoV-2 (COVID-19) as an airborne virus

AMARILLO, Texas (March 22, 2021) – Lonestar Services, an established heating & air company, reaffirms its commitment to the health and wellbeing of the Amarillo area by donating and installing four (4) REME HALO® to local businesses through their #HealthyPanhandle campaign. Business owners interested in this contest should visit www.HealthyPanhandle.com for complete details and application; contest closes promptly at 12pm on April 19, 2021. Certain technical and spatial requirements and limitations are outlined in the official application as well as complete terms and rules. Recipients will be announced on April 26, 2021 and will be featured on #HealthyPanhandle marketing material.

Governor Abbott's Executive Order GA-34 allows businesses and facilities to return to 100% capacity on March 10 and is expected to create challenges as business owners and area residents continue to battle the airborne COVID-19 virus that spreads person to person through aerosols and respiratory particles. This is important for restaurants and bars because if an infected person coughs, sneezes, or even talks, virus particles can stay on surfaces and airborne for hours. Because of these facts, indoor air quality has become a core component to fighting the virus.

Lonestar Services Vice President, Michael McDonald, says the need for these advanced technologies has never been greater. "Indoor air quality (IAQ) is not a new idea, but more people are now aware of how the air they breathe inside directly affects their health. We have known for years that the REME HALO® eliminates viruses like the flu from a home, but now we know that it also eliminates 99.9% of the COVID virus because of RGF's clinical studies."

McDonald says Lonestar Services is an innovative company that strives to improve the lives of their clients with advanced technologies backed by science. ASRE, RGF, Varitec, and Carrier are some of the organizations the company relies on to provide cutting edge research and innovation. McDonald further explained, "Since the beginning of the pandemic, a lot of research has gone into commercializing products that can stop this virus before a person becomes infected. We've had tremendous difficulty getting this information to the public

¹ <https://www.rgf.com/rgf-environmental-group-study-reme-halo-inactivates-sars-cov-2-by-99-9/>

because of social media limiting talks around COVID so we started the #HealthyPanhandle campaign to get products like the REME into the spotlight. We're ecstatic to do the little bit that we can to help the Panhandle return to a smarter and healthier normal."

RGF and Lonestar Services reiterates that the results from the clinical studies were from an independent laboratory under controlled conditions and are in no way a medical claim. The REME HALO® is not a medical device and not intended to diagnose, treat, cure, or to prevent any disease, virus, or illness. IAQ products such as the REME HALO® are a powerful extra layer of protection in the daily fight to stay healthy.
